A FEEDER THAT SAVES YOU TIME AND MONEY

This wonderful feeder is operated on entirely new principles. It is suspended from ceiling of Poultry House by means of light rope the ends of which are attached to ears provided on feeder, the feeder should hang level, about, 4 to 6 inches from the floor. The pan is attached to hopper by means of three short chains and three corresponding spring snaps on hopper. The vibration allowed by this arrangement together with the straight sides of hopper eliminates all possibility of clogging while the practical construction of

the pan including its conical centre absolutely prevents waste and enables the fowls to procure all to the last particle of feed remaining in hopper. The handy spring snaps enable hopper to be easily and quickly regulated to control the flow of various feeds to a nicety. Since it is mechanically built of the best galvanized metal it will last a lifetime and many times over save it's small first cost in feed saved—IT WON'T WASTE—IT WON'T CLOG. It is made in the two popular sizes listed below.

No.	Capacity	Packed	Shipping Wght.	Each	Doz.	Sample Feeders at quantity price, F. O. B. Factory.
27	20 qt.	3 to carton	23 lbs.	\$3.00	\$36.00	
37	40 qt.	2 to carton	21 lbs.	\$3.50	\$42.00
